

Instructional Program Development

The Board believes it necessary that the district continually develops and modifies its curriculum to meet changing needs in technology and fields of knowledge and to assure the full, rounded and continuing development of our students. While keeping with the requirements of state law, the Board authorizes the superintendent to review the curriculum periodically and to advise the Board on curriculum changes needed.

A pilot project is defined as an educational experiment conducted in a controlled environment for a period of time sufficient to test the applicability and viability of the experiment for fulfilling present and future needs of the district.

Requests for permission to conduct such projects must be submitted to the superintendent and must be approved by the Board subject to compliance with state and federal laws and to Board policy and administrative regulations.

Recommendations to add new courses or programs or to delete existing courses or programs must be approved by the Board.

END OF POLICY
