

District Vehicles/Seat Belts/Child Safety System

All drivers operating district-owned vehicles shall use seat belts. Failure to do so is grounds for dismissal.

The driver of any district-owned vehicle, except school buses, is responsible for determining that the proper number of seat belts is available for the passengers and their use is required. A child who weighs 40 pounds or less, regardless of age, must be properly secured with a child safety system. The child safety system must elevate the person so that a safety belt or safety harness properly fits the individual and meets the minimum standards and specifications of law. A person over 40 pounds or who has reached the upper weight limit for the forward-facing car seat must use a booster seat until four feet nine inches or age eight and the adult belt properly fits.¹ A person who is taller than four feet nine inches or eight years of age or older must be properly secured with a safety belt or harness that meets the requirements under ORS 815.055. A district vehicle more than 10,000 pounds or equipped with a lap belt only is exempt from child safety system requirements. The vehicles shall not be driven until the driver and all passengers are buckled up and properly secured.
